Strategies for Assessment & Treatment
Following Tracheostomy: An Interactive Seminar
Presented by Passy Muir
Saturday, June 23, 2018 8:00 a.m. – 4:30 p.m.

University of Kansas Medical Center, Health Education Building,
2160 West 39th Street, Kansas City, KS 66103

This seminar is designed to provide clinical information regarding the basics of a tracheostomy, including the physiologic impact of tracheostomy on a patient's respiratory, speech, and swallowing functions. Clinicians will learn step-bystep strategies to assess for the use of a no-leak speaking valve to restore communication, improve swallow, improve secretion management, and restore subglottic pressure in adults who require tracheostomy. The basics for successful assessment and placement of a no-leak speaking valve in-line during mechanical ventilation will be demonstrated. Attendees will have an opportunity for advanced learning in one of two breakout sessions: (1) advanced session to review ventilator settings, best practice procedures, and safe alarm practice when using a speaking valve; or (2) advanced session on dysphagia assessment and intervention while treating patients with tracheostomy. Attendees will learn the importance of early intervention and strategies for utilizing a no-leak speaking valve through case studies. Learning is enhanced
