- May 5, 2026 **WEBINAR: AI in Water: What's Real, What's Risky, and What's Next**
12:30 PM - 01:30 PM EST
Artificial intelligence is rapidly making its way into the water sector—but not all tools, claims, or use cases are created equal. This webinar will explore what AI is actually being used for in the water industry today, where it provides real value, and where caution is warranted. Panelists will discuss practical applications, potential risks, ethical considerations, and what the future of AI may look like for utilities, consultants, and industry professionals. Designed for professionals at all career stages, this session aims to cut through the hype and provide a realistic, balanced perspective on AI in water.
- Attendees are eligible for a PDH.*
- Hosted by: AWWA/CWP Young Professional Committee*
- May 7, 2026 **Young Professionals of Kentucky/Tennessee Committee Meeting**

11:00 AM - 12:00 PM EST
For more details, please reach out to Cody Phillips, Mackenzie Martin, Olivia Yates, or Brianna Baxter.
- June 4, 2026 **WEBINAR: Your Data is Only as Good as Your Calibration Program**
12:00 PM - 01:00 PM CST
Diana Fish,
diana.fish@nashville.gov
We will discuss the importance of calibration and maintenance with EPA's NPDES handbook about annual requirements, the importance of watching your numbers and why it would be beneficial to calibrate more often.
