

BioNetwork provides high-quality economic and workforce development for the food, craft beverage, and natural products industries in North Carolina through education, training, and laboratory resources.

Multi-parameter Beer Testing

Raising the quality bar for your craft beer

Our suite of services for Brewers is designed to provide data that can be used to ensure the quality and consistency of your products. **North Carolina Craft Brewers Guild members receive one free sample submission per month (up to 6 samples) on our Anton-Paar "suite" of test.**

Data returned

- Alcohol by Volume
- Package pressure
- CO₂
- O₂
- Haze
- Calories
- Original extract (%Plato)
- Appt Degree Ferm (%)
- Real Degree Ferm (%)
- Density CO₂ correlation
- Specific gravity CO₂ correlation

Please get in touch with us before submitting samples to provide you with the appropriate sample submission forms. By doing so, we can ensure that your data applies to the beer tested. It's best to submit your samples in 12 to 16 oz finished product packages as soon after bottling or canning as possible.
